

WINES

Our wine selection by glass changes regularly to harmonise with our food menu, providing a unique dining experience. Listed by grape varieties, we are pleased to provide an array of tastes from around the world and with a special focus on New Zealand wines. As increasingly popular as they are controversial, organic, biodynamic, and natural wines are also identified in our selection. Please see below for a description of these methods. A great wine list should embrace them all. It should celebrate the independent winemaker, who is making wine as natural and minimalistic as possible, as well as the more traditional winemakers.

Organic Wines

Are produced from grapes grown without the use of chemical fertilizers, pesticides, fungicides and herbicides.

Biodynamic Wines

A spiritual-ethical-ecological approach to viticulture in conscious cooperation with nature. Biodynamic wine is made viewing the vineyard as one self sustaining ecosystem. Synthetic fertilizers and pesticides are forbidden for the sake of soil integrity, health and future fertility. Growers aim to leave the land in better shape for future generations.

Natural Wines

Are generally made using 'minimal intervention'. Natural yeast is used with minimal or no sulphur added, grapes are usually left with skins on and there is no filtration, fining, or adjusting. Natural wines look and taste a little different from 'conventional wines'.

Please note a 2% fee applies for all credit cards. Wines & vintages are subject to change and availability.
